Dear colleagues, partners and friends:

The Ethiopian Leather Sector Competitiveness Cluster is progressing well, moving a number of fast-track action initiatives designed in line with the prioritized impediments affecting the dynamism of the industry. These were voted upon and refined in three Cluster Working Group consultations we have had so far.

It is our great pride and pleasure to introduce the business and government leaders who volunteered to champion these initiatives to make progress in the industry.

Please recognize these leaders and support them in the responsibilities they have assumed for our common goal of creating a vibrant, world-class leather cluster in Ethiopia.

In the history of the Ethiopian Leather Industry, these leaders will go down as champions who made things happen.
