

# I. Engagement

Demonstrating agriculture is a viable economic prospect with diverse opportunities, inclusive of value added industries, and achieved through demonstration plots, trainings, and field days.

# 2. Knowledge

Increasing knowledge of good agricultural practices and exposure to other opportunities that expand beyond direct farming such as new technologies and ICT, input supply, support services, and entrepreneurship.

# 3. Assets and Inputs

Supporting youth in obtaining land, loans, inputs, and other agricultural assets through linkages with input providers and financial organizations.

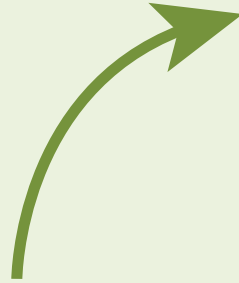

# 4. Income

Demonstrating and facilitating agricultural profitability through introduction of high-value and diverse crops; market linkages; business development; and increasing awareness of alternative employment opportunities in agriculture.

# 5. Leadership

Promoting new tools and technology within communities to position youth at the forefront of agribusiness innovations by fostering linkages with private sector commercial organizations.
